### AUTUMNAL HARPINGS.

Oh! glorious is the Autumn day!  
When on the forest bowers,  
The soft mellow sunlight,  
Its noontide splendor showers;  
On maple, birch, and tulip tree  
Such dyes and tints glow,  
We well might deem that Eden birds  
Were lit on every bough!

Oh! lovely is the Autumn eve!  
When hues of parting day  
Seem like gleaming angel wings  
Shed over sweet decay—  
And wooded knoll and granite pile,  
Hill, stream, and winding shore,  
With clouds of floating amber  
Are softly curtain'd o'er.

Oh! solemn is the Autumn night!  
When through the moonlit air  
The leaves from off their trembling hold  
Go slowly—here and there—  
And fitful breezes wander  
With a miserere moan,  
As the dying breath of leaves and flowers  
Were given in the tone!

Oh! meet in Autumn 'tis to die!  
I, too, would pass away,  
When all bright things and beautiful  
Yield to the spoiler's sway:  
And then I'd feel my life, like theirs,  
Unfailing, pure and true,  
Soon, too, where dwells the Ploist host,  
To spring like light anew!

### THE MAIDEN'S PRAYER.

By John G. Whittier.

She rose from her delicious sleep,  
And put away her soft brown hair,  
And in a tone as low and deep  
Saw love's first whisper, breathed a prayer,  
Her snow white hands together pressed,  
Her blue eyes sheltered in the lid,  
The folded linen on her breast,  
Just swelling with the charms it hid,  
And from her long and flowing dress  
Escaped a bare and snowy foot,  
Whose step upon the earth did press  
Like a snow flake, white and mute:  
And then from slumbers soft and warm,  
Like a young spirit fresh from heaven,  
She bowed that slight and matchless form,  
And humbly prayed to be forgiven.  
O, God! if souls unsoiled as these,  
Need daily mercy from thy throne;  
If she upon her bended knees—  
Our holiest and purest one—  
She with a face so pure and bright,  
We deem her some stray child of light;  
If she with those soft eyes in tears,  
Day after day, in her young years,  
Must kneel and pray for grace from Thee,  
What far, far greater need have we?  
How hardly, if she win not heaven,  
Will our wild errors be forgiven!

## AGRICULTURAL.

**Pickling Eggs.**—The Farmers' dainties in some parts of Hampshire, Eng., in their notable endeavours to turn every thing to good account, have acquired much fame for pickling eggs, which, whilst they constitute a somewhat novel feature in the catalogue of condiments, are at the same time particularly relishing. When eggs are plenty, they take from four to six dozen of such as are newly laid, and boil them hard; then, divesting them of the shells, they place them in large mouthed earthen jars, and pour upon them scalded vinegar, well seasoned with whole pepper, allspice, ginger, and a few cloves of garlic. When the pickle is cold, the jars are closed, and the eggs will be fit for use in a month afterwards. The eggs thus treated are held in high esteem by all the farm house epicures in that part of England.

**Preservation of Pumpkins.**—This Fall let every farmer gather as many of his best matured pumpkins as will suffice to supply his stock with a mess daily through the winter, and deposit them carefully in a close and secure repository, according to the following succinct, and definite rules: 1st, lay a stratum of butts of straw from the threshing floor, one foot thick; on this stratum deposit another of pumpkins, and cover them with another layer of straw, and so on to the end of your heap.

In this way, pumpkins may be preserved most of the year, as sweet and fresh as when taken from the field. Try it, friends, and not leave anything to be discovered by accident, as is the case with experiments in agriculture generally.—*Selected.*

**Iron a Remedy for Blight in Pear Trees.**—A correspondent states that he has found iron ore, or cinders of iron, placed around the roots of trees, drives away the insect which deposits the eggs that produce the worm. Having tried this remedy in a sandy soil, and in a stiff soil and in places distant from each other, and having driven off the insect when the trees of others were very much injured or destroyed in the neighborhood, he advises all those who are troubled by these insects, to try the use of iron, rather than be under the necessity of continually topping off the limbs which contain the worm or young insect. He thinks it probable that the iron is unfavorable to the worm, which drops from the branches, and makes its wintering place at the root of the tree, and then the insect avoids an unfavorable place for its young. But whatever may be the theory, it is sufficient that iron has the desired effect.—*London Gardener's Gazette.*

**Hints to Housekeepers.**—Woolens should be washed in very hot suds and not rinsed.

Lukewarm water shrinks them. Suet keeps good all the year round, if chopped and packed in a stone jar, and covered with molasses. When Molasses is used in cooking, it is a prodigious improvement to boil and skim it before you use it. It takes out the unpleasant raw taste, and makes it almost as good as sugar. Use hard soap to wash your clothes and soft to wash your floors. Soft soap is so slippery that it wastes a good deal in washing clothes. It is easy to have a supply of horse radish all winter, have a quantity grated while the root is in perfection, put it in bottles, fill it with vinegar, and keep it corked tight. Do not wrap knives and forks in woollens; wrap them in strong paper. Steel is injured by laying in woollens.—*American Traveller.*

**Culture of Cabbages by Ships.**—The London Gardener's Chronicle gives the following directions: Cut off healthy sprouts close to the stalk of the cabbage; let them lie in a dry cold place two or three days. Plant, and they require no further trouble. Valuable sorts may thus be preserved unchanged, and a regular succession obtained throughout the year.

**Useful if true.**—It is said that a spoonful of horse-radish put into a pan of milk will preserve it sweet for several days, either in the open air or in a cellar, while other milk will sour.

### GUY C. HOTCHKISS.

IS now opening at his old stand on Market street, an extensive assortment of

**Saddles, Harnesses and Trunks,** of superior workmanship; ALSO, SOLA & UPPER LEATHER, SHOEMAKER FINDINGS, together with every variety of articles usually kept in a Saddlery Establishment—all of which have been selected by him at the North, and are warranted to be of quality to give satisfaction. He has also added largely to his assortment of Buggies, Gigs, Wagons, Carriages, &c., to which he particularly invites the attention of purchasers wishing a good article.

### TO SHINGLE GETTERS.

THE undersigned has been appointed agent for selling the Patent Right to use Kinney's Shingle Machine, in the counties of Halifax, Nash, Johnson, Cumberland, Richmond, and all the counties lying east and south of these, in the State of North Carolina, except the county of Edgecombe, the right of which, has been sold to another. He has also received the agency for the whole state of South Carolina. He is authorized to sell to individuals or to companies, for a single right, right for a county, or for all that part of North Carolina mentioned, in one sale; and likewise in the same way for the districts in South Carolina.

He has made an arrangement with Mr. U. Wells, of Petersburg, Va., to make the Machine to order, to be delivered at any Depot on the Wilmington and Raleigh Railroad, the freight to be paid by the buyer, but he will procure its delivery without charge for his trouble. This Machine is of simple construction, and easy to be kept in order, and can be used either by hand, horse, water, or steam power. Two good hands can easily make from the blocks, from 4000 to 5000 Shingles per day, ready jointed, and nearly as smooth as if planed, and any width desired, from 4 to 10 inches. They could also easily move the machine from place to place, to be convenient to their timber. The cost of the machine, ready made, will be \$50. The price of the right to use it, will vary according to the extent of the purchase. He will have a machine here in a few days, as a sample, and invites the public to call and see it operate.

He will endeavor to obtain a suitable person to carry a Machine into all of the counties to show its value. A. J. BATTLE, Agt., May 23, 1845. 36-1f

## HONOR TO WHOM HONOR IS DUE.

It may truly be said, that no one has ever been so successful in compounding a medicine, which has done so much to relieve the human family, to Health and comfort, as the *Inventor and Proprietor* of that most deservedly popular family medicine, Dr. Swayne's Compound Syrup of Wild Cherry, and none has been so generally patronized by the Profession and others, both in this country and in Europe, nor has there ever been so great an effort in the short space of six or seven years, to deceive the credulous and unthinking, by putting up Nostrums of various kinds, by various individuals, affixing the name of Wild Cherry, and as much of the name of the original preparation as will screen them from the lash of the law, and one of the impostors who puts out the common paragon of the shops and calls it the Balsam of Wild Cherry, has had the impudence to caution the public against the original preparation, Dr. Swayne's Compound Syrup of Wild Cherry, which is doing so much good in the world.

**Beware of such impostors.** And purchase none but the original and only genuine article as prepared by Dr. Swayne, which is the only one compounded by a regular Physician, and arose from many years' close attention to the practice of the profession, and which led to this great discovery. Thousands and tens of thousands of the best testimonials of the unparalleled success of Dr. Swayne's Compound Syrup of Wild Cherry, for the cure of *consumption, coughs, colds, spitting blood, liver complaint, tickling or rising in the throat, nervous debility, weakness of voice, palpitation or disease of the heart, pain in the side or breast, broken constitution from various causes, the abuse of calomel, &c., bronchitis, asthma, whooping cough, &c.,* were declared to the world years before any other preparation of Wild Cherry came out. The most skeptical may satisfy themselves as to the truth of the above, by a little enquiry in Philadelphia. The genuine article is prepared only by Dr. Swayne, whose office has been removed to N. W. corner of 8th and Race streets, Phila'da. The Balsam and other spurious articles of Wild Cherry has been sold out, and the proprietors are obliged to resort to falsehood and stratagem to make their own out of it. The genuine article is put up in plain style in square bottles covered with a blue wrapper, with a yellow label with the proprietor's signature attached. To get the genuine in Wilmington, you must go to the only appointed agent, WM. SHAW.

The public are requested to remember that it is Dr. Swayne's Compound Syrup of Wild Cherry, that has and is repeatedly performing such marvellous cures of diseases which have baffled the skill of the profession and set at defiance the whole catalogue of Patent Medicines, which are daily puffed through the organs of the press. Therefore ask for Dr. Swayne's Compound Syrup of Wild Cherry, and purchase no other. April 11th, 1845.

### Save your Corn Cobs and Shucks.

TO THE PLANTERS AND MILLERS OF NORTH CAROLINA. THE undersigned has obtained Letters Patent, to enable common Mill stones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal, for Horses, Mules, Cattle, Hogs, &c., thereby saving more than one third of a crop, which is an important item with planters. The machinery used for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stone to grind ear corn into meal, requires no new buildings or extra power. It can also be applied to Horse Mills, Thrashing Machines, Gins, or any given power known. The same Mill will grind one-third more of Corn Meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Meal in the space of thirty seconds. Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constituting in its effects, producing founders, colics and various other maladies which are incident to stock. Grinding cobs with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals), by their being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs ground with the corn, produce the necessary distension, without any danger of diseases arising from overeating. Corn and cob meal is improved by scalding, and still more by boiling, and yet more by a partial fermentation. All the preparations facilitate digestion for Hogs, But Horses and Mules will not eat fermented food, consequently they will require it dry or partially wet with cold water. Horses, Mules and Oxen, when fed with unground food, void much in an undigested state, which is of course lost for all beneficial purposes. Read the subjoined certificate.

The undersigned can be addressed at Raleigh, and all calls will be attended to punctually and with despatch by himself for Agent. W. F. COLLINS, 26-1y.

**CERTIFICATE.** Having been solicited by Maj. Collins to have my Mill adjusted to grind Corn in the Ear and Shuck, I consented that he should do so as an experiment; and I am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford me a speedy way of feeding my horses and cattle, and save much thereby. WM. BOYLAN, March 14, 1845.—[26-1y]

**Daniel Cromley,** BOOT MAKER, Front Street, opposite the Chronicle office, WILMINGTON, N. C.

INFORMS his friends and the public in general, that he has made arrangements to manufacture boots entirely adapted to the present times, for CASH. Gentlemen can be accommodated with BOOTS made after the latest FRENCH STYLES. In the manufacture of his work, he will allow none to compete with him in any particular. The work made shall give entire satisfaction. D. C. will take pleasure in showing the different kinds of work to all who will favor him with a call. [Oct. 4th, 1844. 3-1y] Chronicle will please copy.

**WINDOW SHADINGS—BLINDS and DOORS.** THE subscriber is agent for one of the best manufacturers at the North, and will receive orders for the above named articles, which will be boxed up and delivered on board of vessels in New York, at the LOWEST PRICES, and at short notice. Persons about to contract for buildings, will find it to their interest to call and examine prices before sending their orders abroad. GUY C. HOTCHKISS, Sept. 27, 1844 1-1y

**COAL.** Hands put up for family use. For sale by Oct 10, 1845 G. W. DAVIS, London's wharf.

**PAINTS.**—3 cases dark Chrome Green, 2 do bright Lemon Chrome Yellow; 2 do imperial Prussian Blue. Just received and for sale by Ap 23, 1845 [33] BARRY & BRYANT.

**Leaf Tobacco.** hbls., a prime article, for sale by G. W. DAVIS.

## PROSPECTUS OF THE "CONGRESSIONAL UNION" AND "APPENDIX," &c.

THE UNDERSIGNED respectfully inform the public, that, with the commencement of the approaching session of Congress, they will begin the publication of the "Congressional Union" and "Appendix." The first will contain a full and accurate history of the daily proceedings of both branches of the national legislature. It will be compiled with such care, that every citizen who is interested in the public affairs will find it a complete synopsis of their proceedings, and a ready book of reference upon all questions which come before them.

The second, (the "Appendix") will contain every speech which is delivered in the House of Representatives and Senate during the session, reported at length by a full and able corps of congressional reporters, and revised before publication by the authors, whenever it is requested. These two works will be strictly impartial, and are intended to be as interesting and useful to the man of business, and to the politician of the one party as the other.

It may be said, without exaggeration, that the next session of Congress is destined to be one of the most important which has taken place since the foundation of the government. It is the long session. It is the session which will develop the general plan of the present administration. Its measures will stamp the character of our institutions for years to come. Some of the most important questions which are connected with our foreign relations, or our domestic concerns, will be presented for their consideration. The final measure of ratifying the constitution of Texas, which is to consummate her admission into our Union, and the admission of her members into our public councils—every measure which affects the Oregon question—our relations with Mexico—as well as the final decision on the revived Zoll-Verrein treaty,—these, and other measures which are more or less connected with our foreign relations, will come under the review of the approaching Congress. Most of the eminently important questions which relate to our internal concerns—the revision of the tariff—the adoption of the best mode for preserving the public moneys—a variety of commercial measures—perhaps the best system for regulating the important interests of Texas—the Indian questions—the land question—the best system for our navy,—these and others will constitute a mass of business which is calculated to command much of the time of Congress, and much of the attention of the people. They will all be reported by the "Congressional Union."

The Daily, Semi-Weekly, and Weekly Union, will, as usual, embrace an interesting variety of matter on political, scientific, and literary subjects, along with the current news of the day. The editor will continue to devote all his energies to the improvement of "The Union." He finds many accomplished men in this city. The administration has brought with it a considerable accession of talents. Several tried and distinguished members of the democratic party have accepted of office under it. Some of them have liberally contributed their literary labors to our benefit; and we hope to enlist others in our service. Besides, the time is not far distant when the editor intends to call other talents to his assistance. His ambition is, to make his paper worthy of the metropolis of the Union. He is persuaded that, with the facilities which his position enables him to employ; with the official and other materials placed within his reach; and with the aid of the correspondence which he is attempting to establish in foreign countries; a paper may be published, which is not unworthy of the support of his country. In undertaking the task, he knew he had many difficulties to overcome, many lessons to learn, many sacrifices to encounter. He knew that, amid the arduous cares of a new theatre, he could not at first do justice even to himself; but his zeal has never flagged. What enthusiasm and industry can never effect, will be fully accomplished. Some errors he may have already committed. But upon one point, he can speak with great pleasure and with equal freedom. The men who are administering this government are working men, anxious, as he believes, to do their duty, to serve their country, to carry out the pledges under which the President was elected, and the great principles of the party. So long as the administration is conducted in this spirit, and upon those principles, he is prepared to co-operate with them in the public service; and to give them, as he proposed in his prospectus, a "fair, liberal, and efficient support."

We feel a deep sense of gratitude for the prompt manner in which our political friends, in every section of the country, have already come forward to sustain the "Union." May we not hope that our friends throughout the United States will continue to assist our labors, and prevail upon their friends to take some edition of the "Union?" As this will be the long session of Congress, and will probably last eight months, we have concluded to publish the CONGRESSIONAL UNION and APPENDIX on the following

**TERMS.** For The Congressional Union, \$1 1/2 per copy. For The Appendix, \$1 1/2 per copy. Clubs will be furnished with Ten copies of either the above works for \$12; Twenty-five copies for \$25. EXTRA WEEKLY AND SEMI-WEEKLY UNION. For the accommodation of those who desire a paper printed at the seat of government during the session of Congress only, we will furnish them the EXTRA UNION as follows:

	SEMI-WEEKLY	WEEKLY
One copy	\$2 1/2	\$1 1/2
Six copies	13	8
Twelve copies	24	15
One copy	\$1	\$1

## TO THE PUBLIC.

INFORMATION WANTED.—FRANCIS JONES, recently died in the Parish of Iberville, Louisiana, leaving no heirs of his body in that State. He left considerable property, and the object of this publication is to ascertain who are entitled to the succession fund: who are his heirs. It is supposed that Mr. Jones was a native of Wilmington, N. C., and that he removed from this place in boyhood, leaving behind him parents, and brothers and sisters. He died at an advanced age, and of course must have been a long while absent from this place. This is a matter of importance to the heirs of the deceased Mr. Jones, as he left considerable property. Those who may possess any information on the subject will please call on the subscriber. DAVID FULTON, Wilmington, N. C., 27th May, 1845. 37-1f

### 500 PAGES FOR FIFTY CENTS! PROSPECTUS OF THE CONGRESSIONAL JOURNAL.

THE editors of the United States Journal propose to commence, with the next session of Congress, a weekly publication under the above title, to continue throughout the whole session, at the unprecedented low price of FIFTY CENTS! to each subscriber, for a volume of five hundred pages!

It will contain a faithful and impartial record of both Houses of Congress, the gist of all the important speeches which may be delivered, &c., &c.—The most competent reporters will be employed, and nothing shall prevent it being made worthy of the patronage of the public generally. The Journal will endeavor, in its records, to do justice to both parties, so that both parties will feel allowed to patronize the publication. It being the long session, as it is called, the volume will contain at least 500 pages; each number will contain sixteen pages of solid matter, which will enable the publishers to give all the proceedings worthy of being preserved in book form, for binding and future reference. The exceedingly low terms will place it within the reach of all; the publishers hope that their friends will use their exertions in obtaining subscribers.

Those who forward Five Dollars shall receive Eleven copies—Ten dollars, Twenty-three copies—Twenty dollars, Fifty copies—thence the price to forty copies, for a volume of 500 pages. A title page, and complete index will be added at the end of the volume, to make it the more convenient for future reference. THEOPHILUS FISK, JESSE E. DOW, Washington city, Sept 19, 1
